

**Topic of the Speech:**

Colour Evaluation for Textile Products

Professor Tetsuya Sato

The Center for Fiber and Textile Science
Kyoto Institute of Technology (KIT)
Japan

Professor Tetsuya Sato is teaching colour technology at the post-graduate course of in Kyoto Institute of Technology (KIT), Japan. He is the head of Ph.D Course of Engineering Design and the head of Master Course of Design Engineering Management. He is also the head of International Division at the Centre of Fiber and Textile Science of KIT.

He graduated from KIT with a master degree in colour chemistry, and obtained his Ph.D from Otsuma Women's University with his research on colorimetric method for assessing colour fastness of textiles. He is interested in colour science, psychology, human interface, material technology, LOHAS technology, fashion business and so on, which are relating to textile and clothing. Therefore, he is extending his research in colour psychology, colour culture and colour business. Now he is trying to bridge the gap between researches on physical properties and human sensations in colour and textile fields.
